

CDE ResMap Model 468

Designed to meet the needs of 200 mm high volume manufacturing with SMIF cassettes, the ResMap Model 468-SMIF features CDE's patented multiple probe changer - available in either the two or four probe configuration. This unique capability delivers the most cost effective four point probe for conductive film measurements. This model is capable of handling 200 mm wafers in both SMIF and open cassettes; a 150 mm wafer open cassette adaptor is available.
