

REACH Policy Statement

Entrepix Inc. is committed to providing our customers with the highest quality products as well as the responsible reporting of potentially hazardous substances throughout our global supply chain.

REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) entered into force on June 1, 2007. REACH is a regulation of the European Union, adopted to improve the protection of human health and the environment from the risks that can be posed by chemicals, while enhancing the competitiveness of the EU chemicals industry. In principle, REACH applies to all chemical substances; not only those used in industrial processes but also in our day-to-day lives, for example in cleaning products, paints as well as in articles such as clothes, furniture, and electrical appliances. Therefore, the regulation has an impact on most companies across the EU.

REACH places the burden of proof on companies. To comply with the regulation, Entrepix will continue to identify and manage the risks linked to the substances used in the products manufacture in the U.S. and market in the EU. In addition, we will continue to report the presence of these chemicals when required.

Entrepix recognizes this initiative may require additional time and effort on the part of our suppliers and we appreciate their ongoing support in this important effort.
