

## RoHS Policy Statement

Entrepix Inc. is committed to providing our customers with the highest quality products as well as the responsible reporting of potentially hazardous substances throughout our global supply chain.

**The EU RoHS Directive** currently restricts the use of ten substances: Lead, Cadmium, Mercury, Hexavalent Chromium, Polybrominated Biphenyls (PBB) and Polybrominated Diphenyl Ethers (PBDE), Bis(2-ethylhexyl) Phthalate (DEHP), Butyl Benzyl Phthalate (BBP), Dibutyl Phthalate (DBP) and Di isobutyl Phthalate (DIBP).

Rising production and use of electrical and electronic products, such as mobile phones, computers, and kitchen appliances, has resulted in an increasing volume of electrical and electronic waste. During the use, collection, treatment and disposal of such waste, products may release harmful (hazardous) substances such as lead, mercury, and cadmium, which can cause major environmental and health problems.

To address such challenges, EU laws restrict the use of certain hazardous substances in electrical and electronic equipment through the RoHS Directive.

<https://echa.europa.eu/restricted-subs-referred-art-4-rohs/-/legislationlist/substance/100.028.273> All products with an electrical and electronic component, unless specifically excluded, must comply with these restrictions. Entrepix is aware of the Restricted Substances List, we make continued efforts to conform to the requirements of RoHS and maintain our compliance with the initiative.

Entrepix recognizes this initiative may require additional time and effort on the part of our suppliers and we appreciate their ongoing support in this important effort.
